

Chemicals for Wastewater Treatment

Taking bigger steps...
to leave a smaller footprint

Solving the Chemical Equation

In close collaboration with the chemistry specialists at MacDermid Enthone Industrial Solutions, we design and implement comprehensive chemical programs tailored to the specific wastewater challenges of our clients. This partnership allows us to provide effective and reliable solutions by combining cutting-edge chemistry with practical application expertise.

As a fully integrated wastewater treatment solutions provider, MacDermid Envio Solutions ensures that your equipment and chemicals work seamlessly together, optimizing performance and minimizing costs. With over 50 years of experience and a focus on the latest technologies, we solve even the most complex wastewater treatment challenges - delivering results that drive success.

MacDermid Envio Solutions integrated process approach is matched with MacDermid Enthone's chemicals for water treatment including:

- Coagulants
- Flocculants
- Organic Polymers
- Sludge Conditioners
- Membrane Cleaners & Anti-scalants
- Heavy Metal Precipitants
- Odor Control
- Reducing Agents
- Cleaners & Degreasers
- Biocides & Bio-Dispersants
- Defoamers

MacDermid Envio Solutions Advantages

- Tailored Chemical Programs – Ensuring compliance at the lowest cost
- Wastewater Treatment Specialists – Focused expertise, not general boiler or cooling tower technicians
- Integrated Solutions Experts – Optimizing the synergy between chemicals and equipment
